2. Requirements to Conduct Water Survival Training

☐ a) A designated WSSO (Must be a E-6 or above, not required to be a certified instructor, may not serve as an instructor or participate in training).

☐ b) A designated Corpsman or Emergency Response Officer (ERO) with current required certifications as outlined MCO 1500.52_. The Corpsman or ERO will not participate in or assist training.

☐ c) A certified MCIWS / MCITWS (must possess all required American Red Cross certifications).

☐ d) An identified Emergency Response Team (ERT) capable of arriving in 6 minutes or less or located no more than 3 miles away from the training site.

☐ e) An Authorized Government Safety Vehicle or EMS capable of transporting a victim comfortably on a spinal board to the nearest Level II Trauma Facility.

☐ f) The training site must possess an AED, an emergency oxygen device, rescue tubes, a first aid kit, and a spine board with head support.

☐ g) The Pool Deck establishes and maintains positive and continuous two-way communications with the identified ERT. The designated safety vehicle establishes and maintains positive and continuous two-way communications with a Level II Trauma Facility (Training will be suspended immediately upon loss of communications with the ERT or Level II Trauma Facility). Cellular Phones will not be the primary means of communication between the training facility and Emergency Medical Services.

☐ h) Successful completion of an Emergency Response Drill. Completion Time/Date : ☐

3. All Requirements must be completed prior to any water survival training. This is NOT waiverable.
