ORACLE DBMS Enterprise Agreement Usage Survey

NAVMC 11678 (10-09) (EF)

The Marine Corps entered into an Enterprise Agreement (EA) in Nov 2001 with ORACLE Corporation for use of their ORACLE Data Base Management System (DBMS). This agreement provides virtually unlimited ability for MC IT System development and use of ORACLE DBMS. In the very competitive POM environment the capability to demonstrate the value of this agreement to the MC has become increasingly important. **Your input is critical to ensure continued centralized funding of the DBMS.** *Thank you very much.*

Note: It may be necessary for multiple forms to be submitted for a particular IT system in order to adequately capture its' varied DBMS usages.

1. With what Marine Corps IT System is this ORACLE DBMS used?

2. Approximately how many different people use the IT System?

3. Approximately how many of these users are not Active or Reserve Duty Marines, Civilians and Contractors that work for the Marine Corps?

4. What Edition of ORACLE DBMS is implemented?

5. What release of ORACLE DBMS is implemented?

6. How many processors are used to operate this edition of ORACLE DBMS?
Example: An IT System has Enterprise ORACLE DBMS installed on (1) 2-processor server for R&D/Testing and (2) 4-processor servers for Production. Therefore; TotProc = (1 x 2) + (2 x 4) = 10.

7. With what O/S is this ORACLE DBMS installed? Ver

8. Approximately when did this DBMS go into service? Mo Yr

9. Is your IT System using additional options with ORACLE DBMS?

Option 1 Qty of Licenses

Option 2 Qty of Licenses

Option 3 Qty of Licenses

10. Do you use Oracle IAS (app server)? No ☐ If Yes, specify number of servers

11. What other Oracle products do you use or anticipate using?
