CRITERIA	U.S.C. 31 states that liability and accountability for the obligation of apportionments (appropriated funds) must be traceable to an individual. The Commandant of the Marine Corps is responsible for the obligation of appropriated funds provided to the Marine Corps. The Commandant confers this requisition authority upon commanding officers above the company grade, as defined by the Marine Corps Manual, who may in turn delegate an appointee (e.g., supply officer) to carry out this function. Requisition authority is inherent to commands/activities with the Table of Organization (T/O) mission to submit and process/manage financial transactions to fill requirements, and to manage both the fiscal and supply responsibilities inherent to the full life cycle of the transactions and the goods/services procured by them (e.g., from creation of a request through to closing/retirement/disposal). Commands charged with this mission must also posses the T/O supply and fiscal structure necessary to perform all of these functions. Supply officers or civilian equivalents with appropriate supporting supply staff are authorized to submit requisitions on behalf of these commands to obligate appropriated funds, unless stated otherwise in the most current MCBul 5400 or mission statement. The following command-level tasks require requisition authority, as delegated by the commander: supply operations, purchasing, acquisition, creation of orders for temporary additional duty, and labor (to include time keeping), in accordance with MCBul 4420 and MCO 4400.150_. Commands with requisition authority are assigned an authority code of "00" for their DoDAAC in the DoDAAD. Requisition authority is defined as a DoDAAC activity whose commander has the authority to commit financial obligations of appropriated funds (e.g., commanding officers who have supply/contract officers).	This code applies to units authorized to receive mail and/or shipments only. Not authorized requisitioning or billing.	Not authorized requisitioning. For SABRS, this authority code enables a DODAAC to be used as a WCI to perform travle/orders and distribute funds below the WCI level.	Not currently used by USMC.	This code applies to units authorized to receive from/issue to DRMS only. Not currently used by USMC.	Not authorized for requisitioning. For SABRS, this authority code enables a DODAAC to be used as a MRI, ARI, or SRI to perform Labor/Pay processes and distribute funds to the WCI level.	This code applies for no-cost requisitioning/resupply (i.e., maps, flight publications, ASP resupply, etc.)	For HQMC use. This code applies for DODAACs used for unit naming only (i.e., CG, 1ST MARDIV), and is not used for any business processes (i.e., requisitioning, mail, shipping, biling, etc.).
