Rank	Name	EDIPI

23. Medical Officer Screening. Signature is required.

a. Pre-Requisite: The Marine must be medically fit. The Marine must be off any medication prescribed by a physician for at least one year. Once a Marine receives orders a **physical exam must be conducted within 12 months of the class reporting date.** DD forms 2807 and 2808 must be completed. A medical officer will certify in block 74a of DD form 2808 that the Marine is physically qualified for the specific duty he/she is requesting. Commanding Officers will personally screen the Marine's medical record. All special duties are high stress environments. **Any medically documented problems related to hypertension or migraine headaches are disqualifying if the Marine is currently on medication. Additionally, any medical documentation indicating problems with stress or psychological dysfunction may be disqualifying and must be identified.** Marines found unqualified for these reasons may be directed by HQMC to appear before a Physical Evaluation Board (PEB) to determine worldwide assignability.

PHA is sufficient for initial screening; however, a complete physical (as annotated above) must be completed prior to recertification.

Per MarAdmin 586/12:

1. A professional mental health evaluation will be directed when any of the following conditions are met during the initial screening or final certification.
 a. Any disqualifying condition listed in SECNAVINST 5510.30_ and MANMED (NAVMED P-117) Chap 15, Art 15-58 psychiatric and behavioral disorders.
 b.Any history of psychiatric hospitalization, to include drug or alcohol rehabilitation.
 c.Any history of outpatient mental health treatment.
 d. Any history of psychotropic medication for treatment of a mental health condition.
2. During all initial screenings, Medical Officers will review records and conduct a personal interview to determine if a mental health evaluation by a mental health profession is deemed appropriate per the above guidelines. Mental health professionals who conduct evaluations based on the above guidelines will make a determination for special duty assignment using clinical judgment to determine suitability. During final certification, Medical Officers will confirm there has been no change in status from the initial screening.

Requested SDA	Additional Remarks	Initial Screening	Recertification
Recruiting Duty	If applicable, ensure PDHRA is completed prior to recertification.	☐ Qual ☐ Not Qual Last Physical Date: _____	☐ Qual ☐ Not Qual Last Physical Date: _____
Drill Instructor Duty	1. All Marines are expected to be physically fit in order to meet the physical rigors of DI School. Which rigors include conditioning runs and hikes, upper body training and negotiating both the obstacle course and the circuit course. 2. The majority of drops from DI School are due to Marines re-injuring previous injuries. Marines with previous shoulder, back, and/or lower extremity injuries are at risk. 3. Previous injuries are not disqualifying but students must be completely healed and back to full strength before coming to DI School.	☐ Qual ☐ Not Qual Last Physical Date: _____	☐ Qual ☐ Not Qual Last Physical Date: _____
Combat Instructor Duty	There are no injuries or conditions that will inhibit the Marine from successfully and continuously leading or participating in conditioning hikes, conditioning runs, upper body training, negotiating obstacle courses, or participating in combat-related full-contact training.	☐ Qual ☐ Not Qual Last Physical Date:	☐ Qual ☐ Not Qual Last Physical Date:
