2 - Assess Risk

15. Using Risk Matrix: Assign Probability & Severity values to Personnel, Assets, and Mission in initial or as found condition.

a. Probability:	b. Severity:	c. INITIAL RAC:

3 - Make Risk Decisions

Identify Controls, Prioritize Control Measures - Best Options, Systems, Engineering, Administrative, PPE

16. Controls Developed: *(If filling electronically, field will expand to fit entry exiting the field)*

17. Residual RAC: Using Risk Matrix: Re-Assess and determine control effects on intial RAC values assigned in step 2

a. Probability:	b. Severity:	c. RESIDUAL RAC:

4 - Implement Controls

Integrate Guidelines, Establish Resources, Assign Specific Risk Control Actions to Individuals.

18. Implementation Plan: *(If filling electronically, field will expand to fit entry exiting the field)*

5 - Supervise

Use Resources and Guidelines, Lessons Learned and Best Practices, Monitor and Provide Feedback
Use Time-Critical Risk Management (TCRM)

19. Supervision Plan: *(If filling electronically, field will expand to fit entry exiting the field)*

20. Remarks: *(If filling electronically, field will expand to fit entry exiting the field)*

☐ Additional remarks are documented on the reverse side or attached to this form
