INSTRUCTIONS

1. This log provides for recording data on radar operation and significanat radar contacts.
2. Standard Instructions for Operational Data Logs (OPNAV 3100/1) apply, including the sensor operator watch entry.
3. Make a line entry for each event in Code A or otherwise as necessary to describe the contact track.
4. Start a new sheet whenever the date or time zone changes.

BOX	DATA ENTRY
18-21	TIME: Enter the time associated with this line entry. If significant, use the last two columns to record seconds.
23-27	EVENT: Enter the event from Code A if applicable; otherwise, leave blank e.g. recording a change in range and bearing.
28-29	SCAN MODE: Enter "X" in column 28 if operating in circular scan mode or "X" in column 29 if operating in sector scan mode.
30-32	RANGE SCALE SETTING: Enter the range scale setting in kiloyards.
33-36	CONTACT NUMBER: Enter the contact number assigned, omitting prefixes such as hull number or month.
37-39	CONTACT BEARING: Enter contact true bearing in degrees.
40-45	CONTACT RANGE: Enter contact range in yards.
46-77	REMARKS: Enter remarks pertinent to the line entry, e.g., sector limits when in sector scan mode. For contacts, enter estimated contact course and speed if available, and computed CPA data when computed. Remarks related to a previous line entry, but occuring at a different time, shall be recorded on a separate line.

CODE A - EVENT

ON	Radar on and fully operating	OFF	Radar off but operable	RGAIN	Regain contact
SPURT	Spurt (less than 1 min emmission)	DOWN	Radar down (not operable)	CPA	Actually at CPA
STNBY	Radar on standby	UP	Radar repaired an;d operable (follows radar down)	LOST	Lost contact
IMPRD	Radar on but impaired	GAIN	Gain initial contact	SCRUB	Scrub contact
