TAILORABLE EVOLUTION ORM ASSESSMENT SHEET

1. UNIT/GROUP:	2. EVOLUTION/EVENT:	3. DATE:	4. TIME:

	PLANNING/BRIEFING	GRADING	COMMENT
5.	Incorporated specific LL, BP, ORM risk assessments, or other data from previous or similar evolutions during planning in concert with Force Operating Posture.		
6.	Representatives from every functional area necessary to conduct the evolution were involved in planning and functional area participants attended the brief.		
7.	Briefed specified and implied tasks of the evolution effectively to necessary participants.		
8.	Briefed "critical/extreme" and "serious/high" risks to mission and force along with their risk control actions (RCAs) and RCA supervision to necessary participants.		
9.	Individuals are identified, notified, and clearly briefed of their responsibilities for risk controls. All criteria are spelled out.		
10.	Briefed "moderate/medium" risks to mission/force unique to the operating conditions or specific mission (i.e., "what's different today" (WDT) risks) along with their RCAs and RCA supervision to necessary participants.		
	EXECUTION	GRADING	COMMENT
11.	Planned RCAs were executed, assessed, and effects were communicated to supporting/supported functional entities.		
12.	Time critical risk management (TCRM) applied effectively as required by participants during execution.		
13.	Completed specified and implied tasks (if not, why... inadequate hazard ID, RCAs, or RCA supervision).		
14.	RCAs and RCA supervision were effective in controlling "critical /extreme" and "serious/high" risks.		
	DEBRIEFING/ASSESSMENT	GRADING	COMMENT
15.	Participants from every functional area involved in the evolution attended debrief.
