OPNAV UNAUTHORIZED DISPOSITION REPORT

BELOW INFORMATION MUST BE INLCUDED IN EACH BOX

1. Command Records Manager (CRM) Name: Name of CRM or person reporting UD.

2. Command: Program or office responsible for maintaining the records.

3. Date of Report: Date that UD is reported.

4. SSIC #: Standard Subject Identification Code (SSIC) identifying records in UD. (**https://www.secnav.navy.mil/doni/Records%20Management%20Schedules)**

5. Records Series Title: Use Records Series Title related to above SSIC.

6. Description of Records: This is not the Description of Records located in the DON Records Management Schedule. This is the specific description of the records involved in the UD, e.g., *USS Constitution Engineering Logs, DNS Urinalysis Program Records, National Capitol Region Industrial Hygiene Program Records, etc.*

7. Disposition Authority (DAU): DAU related to SSIC #.

8. Time Period of Records: Estimated date range of the time covered by the records, *e.g. emails from CY 2000-2013, FY 2012 budget files or text messages from January - May 2010 etc.*

9. Volume of Records: Volume of Records: Quantify the amount of records lost based on the record medium type or the content of the records, *e.g. 5 cubic feet, 3 case files, 1 TB of data, or 34 emails etc.*

10. Cause of UD: Describe the exact circumstances that led to the UD incident.

- When did these circumstances occur?
- Which agency program office/staff was involved in the UD incident?
- Why did the circumstances occur?

11. Action Taken to Salvage or Reconstruct Records: Describe any agency attempts to salvage or reconstruct the information documented on the records.

- Can information from the records be reconstructed or salvaged?
- Does a backup file of the records exist?
- Does another program office maintain information that could re-establish the record partially or entirely?
- Can a third-party provide copies of the information documented on the records in question?

12. Establish Command Safeguards: Commands must assess current records management processes, procedures, and systems to identify issues that led to the UD.

- Commands must determine what necessary actions can be taken to prevent future losses from happening.
- Provide a detailed description of any established safeguards.
